

APPOINTMENTS

Evidence has shown that people with underlying health conditions, including lung disease, seem to be at greater risk of serious illness from COVID-19. Ocean Springs Lung Clinic will continue to operate and provide care to our patients. We would like for you to keep your scheduled visit with Dr. French; therefore, we are modifying our services to minimize in-person contacts to help our patients.

- If you are above the age of 70 or if you are immunosuppressed, you are at higher risk for COVID-19. If you are able to visit with Dr. French from your home, without having to come into the office, we ask that you please call our office. We can change the existing appointment to a Telemedicine visit. Dr. French will conduct the scheduled visit via telephone or Facetime, without you having to leave your home. All copays and charges still apply.
- Feel free to call OSLC to let us know you have arrived for your scheduled appointment. We will get you checked-in over the phone. You can wait in your car and we will call you straight back to an exam room.

Please know that we are taking all precautions within our office to protect our patients and our staff.

Thank You!
